

Alresford Rugby Club - Proposal for Portable Floodlighting

ARFC are currently training for one hour per week on the Perins Astro Pitch, at a cost of £60 per hr. The club is progressing very well with both 1st & 2nd teams up for promotion this season, therefore we need to increase our training to be more inline with other rugby clubs (4 hrs per week). Perins cannot offer the time slots to accommodate this and even if they could the cost of £240 per week would be unsustainable for ARFC.

We would like to set up portable lighting on the Lower Rugby Pitch, so we could train twice a week, for two hours each session. Traditionally training would be held on a Tuesday & Thursday evening from 7-9 pm.

A small container, half the size of the one we currently have at Arlebury Park would be required to house the lights, when not in use. We are therefore proposing to move the existing container which houses our kit along with the new half container to the Lower Pitch.

The type of lights that we have been looking at are VT2 portable, diesel run, with a manual 7m mast. Two of these would light half a pitch, three the whole pitch. Ideally we would like to light the whole pitch but half pitch training would be an improvement on our current training set up. Please refer to the attachments for further specification & information.

Thanking you in anticipation.

Scott Cleeve
Head Coach - ARFC.
